

## SUBSTITUTE SPECIFICATION (CLEAN COPY)

## CLAIMS

We claim:

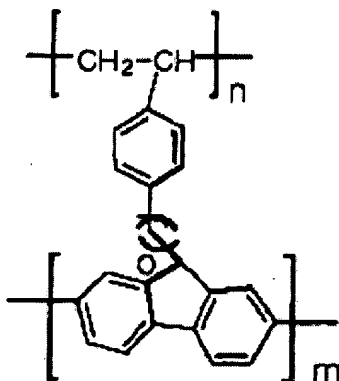

1. A blue light-emitting polymer with ladder-type structure represented by the following formula:

wherein A is selected from polyfluorene, polythiophene, polypyrrole, polycarbazole, polyphenylene, polyaniline, polypyridine; B is selected from polystyrene, polypyrrol, polycarbonate, polythiophene, polyphenylene, polyaniline, polypyridine, polycarbazole; n is an integer of 5 to 100; and m is an integer of 2 to 100.

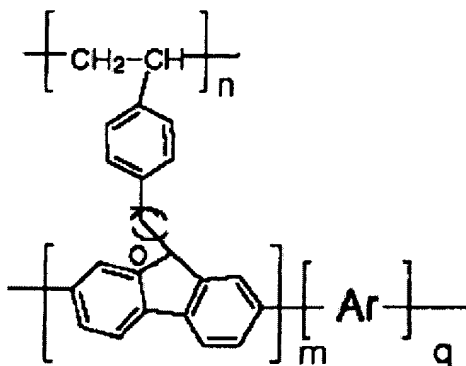

## SUBSTITUTE SPECIFICATION (CLEAN COPY)

2. The blue light-emitting polymers to claim 1, wherein A is polyfluorene with the following formula and B is polystyrene:

wherein n is an integer of 5 to 100; and m is an integer of 2 to 100.

3. The blue light-emitting polymers to claim 2, wherein Ar is aromatic compounds such as fluorene, fluorene derivatives, benzene, benzene derivatives, thiophene, thiophene derivatives, carbazole, carbazole derivatives, pyridine or pyridine derivatives:

wherein n is an integer of 5 to 100; m is an integer of 2 to 100; and q is an integer of 2 to 100.

SUBSTITUTE SPECIFICATION (CLEAN COPY)

4. The blue light-emitting polymers to claim 2 or 3, wherein B is the polystyrene specifically with atactic or syndiotactic structure:
